

PATIENT

Katie Manalansan

SPECIES

Canine

BREED

Golden Retriever

SEX

Female Spayed

AGE

5Y, 7M

WEIGHT

93lbs

INTERPRETED BY

Sebastian Schaub, DVM
Dr. med. vet.
DipECVDI

IMAGING PERFORMED BY

Dr. Abina Glennon

HOSPITAL NAME

New Bridge Veterinary
Practice

REFERRING VET

Dr. Abina Glennon

INVOICE

74614

DATE

4-15-26

PRESENTING CLINICAL SIGNS

Panting heavily
Rule out pulmonary nodules

RADIOGRAPHIC STUDY OF THE THORAX

A right lateral view of the thorax is provided for review.

RADIOGRAPHIC FINDINGS

The body condition score is 7-8/9.

The surrounding bony structures are within normal limits.

The extrathoracic soft tissues present homogeneous without abnormalities.

The heart is of normal size and shape; there is no evidence of cardiac chamber or vascular enlargement. The pulmonary vasculature is within normal limits.

The trachea is normal in diameter and presents the anticipated course. The luminal outline of the trachea is smooth.

The bronchial tree presents with thin walls and tapers uniformly towards the periphery as expected.

The lung field is extending up to the level of the caudal vertebral endplate Th10 – indicative for expiration, accentuating a generalized unstructured interstitial lung pattern. The lung parenchyma presents the expected architecture and opacity; the intrapulmonary vascular branching is seen up to the third order lung vessels.

The diaphragm is well delineated with even surface and the expected mild cranial bulging of the diaphragmatic cupola.

RADIOGRAPHIC DIAGNOSIS

- Obesity

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The appreciated unstructured interstitial pattern is considered as a sequela to expiration and the obesity of the patient. No additional abnormalities are appreciated.

The information and recommendations provided are based on the images presented by the referring veterinarian/sonographer. No evaluation can be communicated regarding pathology that was not visible in the image/video clips provided.

Thank you for this referral. If the clinical or image interpretation does not parallel your findings or if I can be of any further assistance please contact me.
