

**PATIENT PRESENTING CLINICAL SIGNS**

Angelo Citelli Rechecking: progress from meds due to kennel cough History: 16 week poodle mix presented for breathing hard in his sleep only at night. o isn't sure when it started. no more coughing or spitting up foam.

**SPECIES** Abnormal PE/Chem/CBC/UA Results: Exam Notes: Mentation: BAR EENT: No nasal discharge; clear no discharge OU; clean no debris AU; N Oral Cavity: Juvenile dentition Lymph Nodes: N Skin: Good hair coat, no fleas. No lesions noted. CV/Respiratory: No murmur, clear lung sounds bilaterally. No coughing. Abd/GI: N Uro/Perineum: N Musculoskeletal: Ambulatory x4, no lameness noted. BCS 5/9 Neurological: Appropriate

**BREED RADIOGRAPHIC STUDY OF THE THORAX**

Poodle Mix Radiographs of the thorax in two imaging planes are provided for review.

**RADIOGRAPHIC FINDINGS**

**SEX** The surrounding bony structures are within normal limits, the growth plates are age related open.

Male The extrathoracic soft tissues present homogeneous without abnormalities.

The heart is of normal size and shape, there is no evidence of cardiac chamber or vascular enlargement. The pulmonary vasculature is within normal limits.

**AGE**

16 Weeks The cranial mediastinum presents the expected soft tissue opacity. The thymus can be appreciated as a sail-like soft tissue opacity at the left cranial aspect of the cardiac silhouette.

**INTERPRETED BY**

The trachea is normal in diameter and presents the anticipated course. The luminal outline of the trachea is smooth.

Sebastian Schaub, DVM  
Dr. med. vet. DipECVDI

The bronchial tree presents with thin walls and tapers uniformly towards the periphery as expected.

**HOSPITAL NAME**

The lung parenchyma presents the expected architecture and opacity; the intrapulmonary vascular branching is seen up to the third order lung vessels.

DPC Veterinary Hospital

The diaphragm is well delineated with even surface and the expected mild cranial bulging of the diaphragmatic cupola.

**RADIOGRAPHIC DIAGNOSIS**

**REFERRING VET**

- Normal thorax

Dr. White

**INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS**

**INVOICE**

The radiographic study of the thorax presents age related physiological findings.
