SPECIES RADIOGRAPHIC STUDY OF THE ABDOMEN

Canine Radiographs of the abdomen, including a barium gastrointestinal positive contrast passage, are provided for review.

BREED RADIOGRAPHIC FINDINGS

Weimaraner The surrounding bony structures are within normal limits.
No abnormalities of the extraabdominal soft tissues are noted. The abdominal wall is smooth and thin.

SEX The serosal detail is maintained throughout the peritoneal and retroperitoneal space.

Female The liver is appropriate in position, size and presents uniform opacity.

The splenic head is in the anticipated position and within normal limits for size and opacity. The splenic body and tail are considered normal for position, size, shape and opacity.

AGE Both kidneys are seen and present with normal size, shape, delineation and opacity. The urinary bladder is in its anticipated position. No radiopaque calculi are noted throughout the upper and lower urinary tract.

1 Year

INTERPRETED BY

The stomach is in its anticipated position and contains a small amount of fluid and gas.

Sebastian Schaub, DVM
Dr. med. vet. DipECVDI

The small intestinal loops are of even diameter and non-dilated, a small amount of gas is seen within the small intestinal loops and considered within normal limits.

HOSPITAL NAME

The colon is seen in the expected position and is empty.

Tenafly Vet Center

In the barium contrast passage, the contrast medium passes the gastrointestinal tract within 4 hours and can be appreciated in the ascending and transverse colon. The outline of het contrast column throughout the intestinal tract is smooth.

REFERRING VET RADIOGRAPHIC DIAGNOSIS

Dr. Barnea

- Empty gastrointestinal tract
- Normal gastrointestinal barium contrast passage

INVOICE INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

57630 The radiographic study of the abdomen presents without abnormalities, explaining the history of intermittent vomiting. There is no evidence of radiopaque foreign material, abnormal gas pattern or signs for gastrointestinal mechanical obstruction.
