

PATIENT

Fasb Bullinger

SPECIES

Canine

BREED

Lhasa Apso

SEX

FS

AGE

12Y, 10M

WEIGHT

9.2lbs

INTERPRETED BY

Sebastian Schaub, DVM
Dr. med. vet.
DipECVDI

IMAGING PERFORMED BY

Dr Jessie Evoniuk

HOSPITAL NAME

State Avenue Vet
Clinic

REFERRING VET

Dr Jessie Evoniuk

INVOICE

75043

DATE

5-19-26

PRESENTING CLINICAL SIGNS

Chronic rhinitis/sinusitis, progressed
Compare CT today and on 9/2024

Eating slower, doesn't like hard treats - does show interest in food
Mucus discharge from both nostrils - clear, sometimes a little green
Breathe through the mouth, with abnormal sound

Meds: None - did have 1/2 Trazodone last night and this AM

Abnormal PE/Chem/CBC/UA Results: 4/28/26: ALP 15, BUN 62 9/9/24 CT: Destructive rhinitis, Absent triadan 105 and 205

COMPUTED TOMOGRAPHY OF THE SKULL

A high resolution plain CT study of the skull is provided for review.

COMPUTED TOMOGRAPHIC FINDINGS

A moderate brachygnathia superior is appreciated. Triadan 105 and 205 are absent.

In both nasal cavities, moderate destruction of the conchal structures is appreciated. A moderate amount of uniform soft tissue attenuating material is attached to the nasal mucosal lining. The frontal sinus bilaterally is absent.

Both temporomandibular joints present congruent joint spaces with even subchondral bone surfaces and are considered within normal limits.

Both tympanic bullae are aerated, the mucosal lining is not seen, the bony wall is smooth and thin. The external ear canals are within normal limits.

The submandibular and medial retropharyngeal lymph nodes are small and elongated with a normal short-to-long-axis-ratio is < 0.5, the attenuation pattern is uniform.

COMPUTED TOMOGRAPHIC DIAGNOSIS

- Destructive rhinitis – nearly stationary
- Absent triadan 105 and 205

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The destructive rhinitis is fitting the history – the findings appear to stationary, but increased amount of soft tissue material associated with the nasal conchal structures. The presumptive diagnosis is non-specific rhinitis.
