Chiyo Kinoshita recent hx of cervical pain, successfully managed w strict rest and medical management (Pred, Gabpentin); 4 days ago P might have experienced a mild flare up for which O gave single dose of Gabapentin - immediate improvement; rads obtained today - pls comment on the "hooks" at ventral rostral C6 vertebral body)

SPECIES

Canine

RADIOGRAPHIC STUDY OF THE CERVICAL SPINE

Radiographs of the cervical spine in two orthogonal imaging planes are provided for review.

BREED

RADIOGRAPHIC FINDINGS

Boston Terrier

The osseous and soft tissue structures of the cervical spine present no abnormalities.

RADIOGRAPHIC DIAGNOSIS

SEX

- Normal cervical spine

Female Spayed

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

AGE

10

The radiographic study of the cervical spine presents without abnormalities, explaining the history of cervical pain. The appreciated hook shaped mineral opacities at the cranioventral aspect of C6 is compatible with orthogonal projection of the cranioproximal margins of the transverse processes.
