

PATIENT PRESENTING CLINICAL SIGNS

Lava Frederick Stranguria for 3 days with mild hematuria noted on cystocentesis. No PU/PD or U O/S L/B noted. All else WNL.
Abnormal PE/Chem/CBC/UA Results: PE normal.

SPECIES RADIOGRAPHIC STUDY OF THE ABDOMEN

Feline Radiographs of the abdomen in three imaging planes are provided for review.

RADIOGRAPHIC FINDINGS

BREED
DSH The periarticular bones of the right stifle joint present mild osteophyte new bone formation. The acetabular groove bilaterally is shallow.

No abnormalities of the extraabdominal soft tissues are noted. The abdominal wall is smooth and thin.

SEX The serosal detail is maintained throughout the peritoneal and retroperitoneal space.

Female Spayed The liver is appropriate in position, size and presents uniform opacity.

The splenic head is in the anticipated position and within normal limits for size and opacity. The splenic body and tail are considered normal for position, size, shape and opacity.

AGE

2 Years, 10 Months

Both kidneys are seen and present with normal size, shape, delineation and opacity. The urinary bladder is in its anticipated position. No radiopaque calculi are noted throughout the upper and lower urinary tract.

INTERPRETED BY

The stomach is in its anticipated position and presents normal content.

Sebastian Schaub, DVM
Dr. med. vet. DipECVDI

The small intestinal loops are of even diameter and non-dilated, a small amount of gas is seen within the small intestinal loops and considered within normal limits.

HOSPITAL NAME

The colon is seen in the expected position and presents with appropriate content.

Northvale Veterinary
Clinic

RADIOGRAPHIC DIAGNOSIS

- Mild degenerative osteoarthritis right coxofemoral joint due to hip dysplasia

REFERRING VET

Dr. Stefanie Simon

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The radiographic study of the abdomen presents no evidence of radiopaque urinary calculi. Workup might be complemented by an ultrasound examination of the abdomen to screen for non-radiopaque urinary calculi, bladder sand or mural changes of the bladder wall (e.g. inflammatory changes).
