

PRESENTING CLINICAL SIGNS

PATIENT

Juno Dueck

History: Getting attacked by porcupine on the mouth. Owner is not sure if she got on the spines from the right upper lip. On physical exam, we couldn't find any spine, which is why we want to see if something was missed on the x-ray

Abnormal PE/Chem/CBC/UA Results:

SPECIES

Canine

RADIOGRAPHIC STUDY OF THE SKULL

Radiographs of the skull in multiple imaging planes are provided for review.

BREED

Australian Shepherd

RADIOGRAPHIC FINDINGS

The osseous, dental and soft tissue structures of the pictured parts of the skull are within normal limits.

SEX

Spayed Female

RADIOGRAPHIC DIAGNOSIS

- Normal skull

AGE

1 Year

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The radiographic study of the skull presents without abnormalities. If any swelling develops, reevaluation of the patient is recommended, ultrasound can be used to screen for foreign material.

The information and recommendations provided are based on the images presented by the referring veterinarian. No evaluation can be communicated regarding pathology that was not visible in the image/video clips provided.
