

**PATIENT PRESENTING CLINICAL SIGNS**

Storm Green Reason for Visit: Limping History: Storm, a 4yr old Spayed Female DSH presents today for limping. P has been limping for over a month on her right front leg and P just lays around. P will stay on her heating pad all day and lean on her right side. P has no interest in playing/running around like she normally does. P can still get around to eat/drink and go to litterbox, but that's all she gets up for. O tried giving P Gabapentin, but did not help.

**SPECIES**

Feline

**BREED**

DSH

**SEX**

Spayed Female

**AGE**

4 Years 9 Months

Abnormal PE/Chem/CBC/UA Results: CV/Respiratory: Normal heart rate and rhythm, no murmur, pulses strong and synchronous, normal bronchovesicular sounds. EENT: Clear OU and AU. No nasal discharge. No cough on tracheal palpation. Oral cavity: N Musculoskeletal: BCS = 8/9. Ambulatory x 4. No lameness on ambulation, normal ROM of shoulder joints. Uro/Perineum: No significant lesions Abd/GI: Soft, non-painful. No masses or fluid wave palpated Lymph Nodes: No peripheral lymphadenopathy Neurological: Alert and appropriate. No significant abnormalities Skin: Good hair coat. No ectoparasites seen Mentation: BAR Hydration: N Fecal: Not performed today

**RADIOGRAPHIC STUDY OF THE RIGHT SHOULDER JOINT**

Radiographs of the right shoulder joint in two orthogonal imaging planes are provided for review.

**RADIOGRAPHIC FINDINGS**

The osseous and surrounding soft tissue structures of the right shoulder joint are within normal limits.

**RADIOGRAPHIC DIAGNOSIS**

- Normal right shoulder joint

**INTERPRETED BY**

 Sebastian Schaub,  
 DVM Dr. med. vet.  
 DipECVDI

**INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS**

The radiographic study of the right shoulder joint presents without abnormalities, unable to explain the right front limb lameness.

**HOSPITAL NAME**

DPC Vet Hospital

**TECHNICAL COMMENTS**

A human finger is seen in the primary beam, please consider radiation safety guidelines!

**REFERRING VET**

Dr. Rivera
