SPECIES

Canine

RADIOGRAPHIC STUDY OF THE LUMBAR SPINE AND STIFLE JOINTS

Radiographs of the lumbar spine and stifle joints in two orthogonal imaging planes are provided for review.

BREED

Havanese

RADIOGRAPHIC FINDINGS

The osseous and surrounding soft tissue structures of the lumbar spine are within normal limits. The stifle joints present smooth osseous margins, the patella bilaterally is in situ, unremarkable.

SEX

FS

RADIOGRAPHIC DIAGNOSIS

- Normal lumbar spine
- Normal stifle joints

AGE

4.4 Years

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

The radiographic study of the lumbar spine and the stifle joints are within normal limits. If there is strong clinical suspicion for discopathy and if clinical signs deteriorate, cross-sectional imaging might be considered.

INTERPRETED BY

Sebastian Schaub, DVM
Dr. med. vet. DipECVDI

HOSPITAL NAME

Boca Park Animal
Hospital

REFERRING VET

Spaulding

The information and recommendations provided are based on the images presented by the referring veterinarian. No evaluation can be communicated regarding pathology that was not visible in the image/video clips provided.
