

**PRESENTING CLINICAL SIGNS****PATIENT**

Boo Lupo

History: patient was presented for high pitched choking sound , pet did very well on prednisolone and once prednisolone stopped symptoms came back

SPECIES

Canine

Abnormal PE/Chem/CBC/UA Results: stridor noise laryngoscopy under propofol shows mild erythema on laryngeal cartilage with weak movement

RADIOGRAPHIC STUDY OF THE NECK & THORAX**BREED**

Labrador Retriever

Radiographs of the neck and thorax in orthogonal imaging planes are provided for review.

RADIOGRAPHIC FINDINGS**Neck****SEX**

Intact Female

The osseous and soft tissue structures of the neck are within normal limits.

Thorax**AGE**

1 Year

The surrounding bony structures are within normal limits.

The extrathoracic soft tissues present homogeneous without abnormalities.

The heart is of normal size and shape, there is no evidence of cardiac chamber or vascular enlargement. The pulmonary vasculature is within normal limits.

INTERPRETED BY

Sebastian Schaub,
DVM Dr. med. vet.
DipECVDP

The cranial mediastinum presents the expected soft tissue opacity. The mediastinal width is less than twice the width of the vertebral column at the same level.

The trachea is normal in diameter and presents the anticipated course. The luminal outline of the trachea is smooth.

HOSPITAL NAME

Central Jersey AH

The bronchial tree presents with thin walls and tapers uniformly towards the periphery as expected. The lung parenchyma presents the expected architecture and opacity; the intrapulmonary vascular branching is seen up to the third order lung vessels.

REFERRING VET

Dr. Samuel Gabriel

The diaphragm is well delineated with even surface and the expected mild cranial bulging of the diaphragmatic cupola.

RADIOGRAPHIC DIAGNOSIS**INVOICE**

17186

- Normal neck
- Normal thorax

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS**DATE**

9/2/22

The radiographic study of the neck and thorax presents without abnormalities.

PATIENT

Boo Lupo

The information and recommendations provided are based on the images presented by the referring veterinarian/sonographer. No evaluation can be communicated regarding pathology that was not visible in the image/video clips provided.

SPECIES

Canine

Thank you for this referral. If the clinical or image interpretation does not parallel your findings or if I can be of any further assistance please contact me.
