

**PATIENT**

Persefone Kusztra

**PRESENTING CLINICAL SIGNS**

Persefone is a 16m/o spayed female DSH presented for vomiting. Has a history of vomiting every 2 or 3 hours over the last 2 days. On Exam: NSF

**SPECIES**

Feline

**RADIOGRAPHIC STUDY OF THE ABDOMEN**

Radiographs of the abdomen in three imaging planes are provided for review.

**BREED**

Domestic Shorthair

**RADIOGRAPHIC FINDINGS**

The surrounding bony structures are within normal limits.

No abnormalities of the extraabdominal soft tissues are noted. The abdominal wall is smooth and thin.

**SEX**

Spayed Female

The serosal detail is maintained throughout the peritoneal and retroperitoneal space.

The liver is appropriate in position, size and presents uniform opacity.

The splenic head is in the anticipated position and within normal limits for size and opacity.

**AGE**

16 Months

Both kidneys are seen and present with normal size, shape, delineation and opacity. The urinary bladder is in its anticipated position. No radiopaque calculi are noted throughout the upper and lower urinary tract.

The stomach is in its anticipated position and is empty.

**INTERPRETED BY**

Sebastian Schaub, DVM  
Dr. med. vet. DipECVDI

The small intestinal loops are of even diameter and non-dilated, a small amount of gas is seen within the small intestinal loops and considered within normal limits.

The colon is seen in the expected position and presents with appropriate content.

**HOSPITAL NAME**

Beaches-Fallingbrook  
Veterinary Clinic

**RADIOGRAPHIC DIAGNOSIS**

- Empty stomach

**REFERRING VET**

Dr Sam Shahsavari

**INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS**

The radiographic study presents no underlying cause for the vomiting. There is no evidence of radiopaque foreign material or signs for gastrointestinal mechanical obstruction. The presumptive diagnosis might be gastritis. If clinical signs are refractory to therapy, recommend follow up radiographs or a complete abdominal ultrasound examination; in some cases a high ileus may lack classical radiographic signs of mechanical obstruction.
