SPECIES Feline
BREED Russian Blue
SEX NM
AGE 12 Years, 6 Months

Abnormal PE/Chem/CBC/UA Results: Hydration: Appropriately hydrated Mentation: BAR, nervous EENT: No nasal discharge; clear no discharge OU; clean no debris AU; No cough on tracheal palpation. Oral Cavity: heavy dental tartar present Lymph Nodes: Symmetrical, no changes in size, shape, consistency Skin: Good hair coat, no signs of ectoparasites. No lesions noted. CV/Respiratory: No murmur or crackles/wheezing auscultated. Normal bronchovesicular sounds. Abd/GI: Soft non painful abdomen, no organomegaly, no abnormalities on abdominal palpation Uro/Perineum: N, unable to palpate bladder (empty) Musculoskeletal: Ambulatory x4, no lameness noted. No pain on palpation of limbs. BCS 5/9 Neurological: Appropriate

RADIOGRAPHIC STUDY OF THE ABDOMEN

Orthogonal views of the abdomen are available for review totaling 2 images.

RADIOGRAPHIC FINDINGS

The urinary bladder is mildly filled with the apex in the plane of cranial L7 and is homogeneously soft tissue opaque.

The renal silhouettes are normal in size, shape, and opacity. No evidence of radiopaque calculi.

The retroperitoneal space is normal.

The stomach contains a small amount of gas admixed with heterogeneous soft tissue food material; it is in normal position.

The small intestines are normally distributed, of normal diameter, contain a small amount of gas, and mildly homogeneous soft tissue fluid material.

The colon contains a small amount of heterogeneous opaque fecal material and gas.

The liver and spleen are normal in size, shape, and contour.

The abdominal serosal detail is normal.

The collimated thorax is normal.

L7-S1 transitional vertebra, incidental.

The collimated musculoskeletal structures are unremarkable.

RADIOGRAPHIC DIAGNOSIS

- Normal radiographic abdomen
- No evidence of radiopaque calculi in the urinary tract.
- L7-S1 transitional vertebra, incidental

INTERPRETATION OF THE FINDINGS & FURTHER RECOMMENDATIONS

No radiographic signs of abnormalities in the urinary system or abdomen.

Consider an ultrasound for a urinary system examination if the urinating issues persist.
